# Ausbildung zum Automechaniker in Morkiswa, Uganda

## Vocational Education Auto Mechanics in Morkiswa, Uganda

---

### **Morkiswa Students Voices, Rasmus**

My name is Okeetch Rasmus from Nagongera Town Council, 22 years old. I am doing a National Certificate Course in Auto Mechanics at Morkiswa Community Skilling Institute (MCSI) after completing my Ordinary Level in Mother Kevin Senior Secondary School in Tororo. I am now in my second year, completing my course at the end of this year.

When the people who sponsor my education told me to join a technical school for technical education, I saw this as an abuse because I wanted to join the university after my high school. But after seeing how interesting it is to repair cars and it starts running I got excited and my interest in the course grew. When we get to industrial training it gets even more interesting. Our supervisor teaches us more things during the training. I regularly take my industrial Training in Busia town by the Uganda/Kenya Border. We also visit The New Expert Motors for regular training.

Morkiswa Community Skilling institute is a very good school, with good teachers and the directors. We receive regular volunteers from Europe who continue to encourage us that technical education made Europe develop faster. The directors get us the students connected to places where we do industrial Training and where we find jobs.

Unfortunately Morkiswa does not have good training building, no running cars, which we consider very important for our training. We have asked the directors to create for us service pit and a running car then we shall have a better training facility but most times they say they do not have money. We also lack training materials that are very needed for our practical.

Many things have become better after Stichting Morkiswa brought electricity. We have seen them (Stichting Morkiswa) roofing for a dining hall. We used to eat under the trees, in our dormitories and on varandas. But we shall now enjoy our meals in a dining halls. We hope can also get the dining table and seats for the dining hall. Up to now we the institute has very poor and few furniture even for classrooms.

Otherwise so far so good for my future. I can see that I will be able to support my family.

## VOICES

**Annet Aiseri**  
Student of Plumbing

"I want to become a professional engineer. Many places still have no access to clean water and my goal is to change this."

**Julius Olupot**  
Student of Wood Work

"At MCSI I am learning the technical skills that I need to succeed in the future. Becoming an architect is my biggest dream."

**Mr. Aggrey Namaswa**  
Principal at MCSI

"My greatest vision is to impart my knowledge to students who are eager to learn. And MCSI provides the environment needed."

**Mr. Wodulo Mwambu**  
HR Director, Tororo Cement

"We highly encourage students to join MCSI. The internships at TCL help us to identify our very needed future employees."

# MORKISWA COMMUNITY SKILLING INSTITUTE

FIRST CHOICE AMONG  
STUDENTS & EMPLOYERS

TRUSTED SINCE 2014

## OUR VISION

We want to become the number one vocational school in Uganda offering the best value for money. In doing so, we contribute to the social and economic empowerment of the less privileged in our community. What is more, we impart our values of respect, discipline and morality.

## OUR COURSES

The school offers a modern and fully equipped learning environment to its students. Our highly committed and certified instructors are exemplary for the exceptional educational standard at MCSI. Graduates attain valuable technical skills, improving their career perspectives notably. A separate and secured accommodation for our female students is self-evident. Further, students are free to enjoy our after-school activities including regular worship services, games and football.

**"WE ARE COMMITTED TO GIVING OUR STUDENTS THE BEST POSSIBLE VOCATIONAL TRAINING AND PREPARE THEM FOR A SUCCESSFUL PROFESSIONAL CAREER."**

Francis Okech, Director of MCSI

We are registered with UBTEB & DIT and offer a variety of certificate courses.

- 01 - AGRICULTURE
- 02 - AUTOMOTIVE MECHANICS
- 03 - BUILDING CONSTRUCTION
- 04 - ELECTRONICS SYSTEMS
- 05 - HAIR DRESSING
- 06 - HOTEL & INSTIT. CATERING
- 07 - PLUMBING
- 08 - TAILORING & FAHION DESIGN
- 09 - WELDING & FABRICATION
- 10 - WOOD WORK TECHNOLOGY

## OUR SCHOOL

We cooperate with prestigious organizations in Uganda, Europe and USA.

**Tororo Cement Ltd., Uganda**  
**Tools to Work, Netherlands**  
**SES - Senior Expert Services, Germany**  
**PUM - Senior Experts, Netherlands**  
**Internat. NGOs, e.g. Compassion Int., Covenant Mercies, Hope 4 Kids**

## OUR PARTNERS

# Ausbildung zum Elektriker in Morkiswa, Uganda

## Vocational Education in Electrical Instalation in Morkiswa, Uganda

---

### **Morkiswa Students Voices: Julius**

I am Julius Okuni, 21 years, from Nagongera town council. My father died after being poisoned by neighbors who hated him when I was 3 years old. I grew up an orphan. Fortunately, I was taken up by a Christian Organization called Generation Focus from the time I was a child. Generation Focus took care of me, and my education. And till now they are the one paying my education.

After completing my O' level (senior 4) at St. Benedict Secondary School, Tororo, I thought I would join high school and proceed to a university for bachelor's degree. But our career master advised that it would be easier to find employment and start earning early if I could go for a technical training.

This is how I ended up in Morkiswa Community Skilling Institute (MCSI), in my second year doing Electrical Installation. I am attached Tororo Cement Industry for Industrial Training. I hope I join the Industry after the course that ends in November 2018.

I have found MCSI a very friendly school: good and parental directors, good instructors and good atmosphere for training because of its rural location. We had a bad time when we had no electricity. We were learning electricity but there was no electricity for demonstration. But we thank Stichting Morkiswa for sending financial support for installing electricity. Our directors do a lot to create partnerships and do networks for us, and find life meaningful. We participated in wiring the institute by ourselves as students of Electrical Installation.

I believe I will find a job as soon as I complete my education and start earning so that I can be able to support my family.

I thank Generation Focus for the tuition; I thank the Institute Directors for bringing affordable technical school near my home; I thank my teachers for being dedicated and I thank Stichting Morkiswa for bring electricity to the institute. We have lights and we can use small electrical machines.

# Ausbildung zum Schweißer in Morkiswa, Uganda

## Vocational Education Welding in Morkiswa, Uganda

---

### **Morkiswa Students Voices, Ronald**

I am known by the names, Musalosalo Ronald, a welding student at Morkiswa Community Skilling institute. I come Busia District, 50km away from the institute. My uncle who works abroad was told of this school on email and when he returned to Uganda he came with me to see the school. We met the Director, Mr. Francis Okech, who gave us a very warm welcome. After taking us through the school, we saw that I could do my welding training in the institute, since there are welding machines and electricity in a large workshop.

I am 20 years old. I joined Morkiswa Community skilling Institute after senior 4, pursuing a one year course. I am enjoying my training at the institute and my instructors told me that I am likely to be retained in the school to be a teacher at the end of my training. I have continued to perform very well because I enjoy the course of welding. I am very sure I chose the right course and the right institute.

The teachers and the institute are very good. Since there are several things to be welded for the institute like windows, doors, louvers, repairs, work from the community, etc., we find ourselves very busy, making training very interesting and enjoyable. And I am very willing to bring other students to this institute.

Morkiswa Community Skilling institute is a very good school, with good teachers and the directors but lacks a few basics: furniture, windows don't have glasses and whenever it rains we suffer a lot with wind and storm. We also don't have showroom for our products. The directors need to build a showroom so that welding department can show what we do for selling.

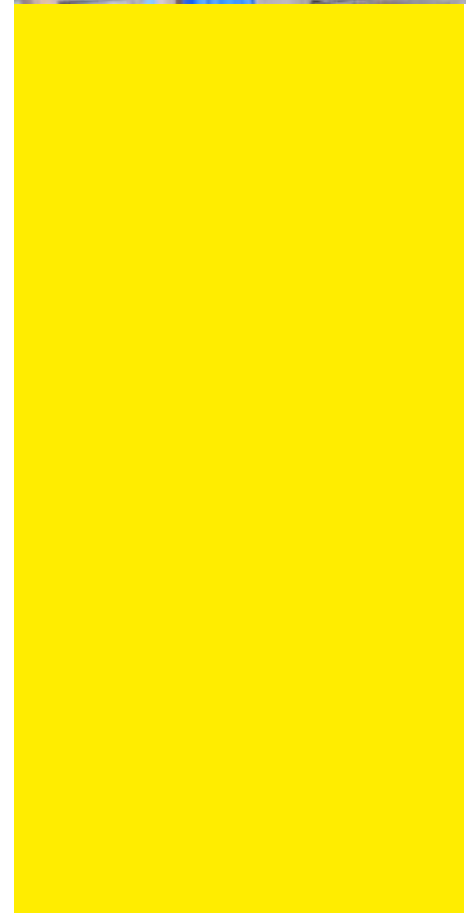

Availability of electricity is a huge boost for our training. Our directors and teachers encourage students to work hard. The job market is available. I will not look for employment as far as I know what my profession and the job market, and demand for our products.

Several students need to find skills of this kind to be able to fight against poverty. I am now very sure of support myself and my family. I can make beds, chairs, windows, doors, and several other metal products, given opportunity. I am very proud of Morkiswa Community Skilling Institute.
